

The procedure to add a PDI (pre-delivery inspection) on a Ford F-650 or F-750 Medium Duty truck can be done right on the CVT Ford Pro ordering screen. Follow the instructions below to automatically move the unit to National Fleet Services for inspection before final shipment.

Once logged into CVT:

1. Select the model and options
2. On the "Factory Options" screen select "Ship-Thru"
3. Select 21A "Pre-Delivery Inspection"
4. Select 31F "Ship-Thru - NFS National Fleet Services"

If you require a Ship-To other than the ordering dealership, you can add the Ship-To code in the "Order Info" category.

If you have any questions or need additional support, please contact us by calling 313-923-1799.
